

OBJECTIVE

Tie every signed mandate to the model version the agent was tested on, and reopen the mandate when that version changes. The supplier replaces on its own schedule; the signed text does not move by itself.

WHAT TRIGGERS A REVIEW

VERSION CHANGE

Major or minor: both count

ANNOUNCED CHANGE OF BEHAVIOUR

Supplier release note

OBSERVED DRIFT (← ACF-P4)

Supervision, sampled review

A mandate is signed against a version. When the version changes, what was signed no longer describes what decides.
